SET-UP GUIDE

STEP 1: GETTING STARTED

Simply place the metal frame up as shown in the picture. Note that the base has two rectangular notches where the wheels will sit. When the plastic base is in place, fill the base with water, through the screw hole on the top.

STEP 2: CLIP THE GRAPHIC

The silver clips hold the graphics. Simply, pull the spring rounded end, and the clip will open. Insert the curved silver hook through the holes in the graphics top, and snap the clip closed.

Moving the Frame

Stand with your feet beside the wheels and tilt the frame towards yourself.
