Yello

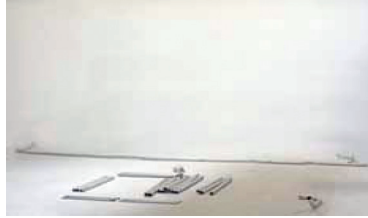

FABRIC BACKDROPS  
HORIZONTAL CURVE WALL

## SET-UP GUIDE

---

## STEP 1: GETTING STARTED

---

Lay both your pole sections down on the ground. These are represented as your top and bottom section of the frame. Connect each of the poles together.

Depending on which set you ordered, your poles may look slightly different from these.

---

## STEP 2: ASSEMBLE SIDE POLES

---

Take your medium sized poles and lay them down to the side of your frame, these are represented as your side poles. Connect the poles together.

---

## STEP 3: CONNECT ARCHED POLES

---

Using the number guided system connect the arched poles to it's corresponding number creating 8 piece pole sets.

---

## STEP 4: CONNECT USING THE NUMBER SYSTEM

---

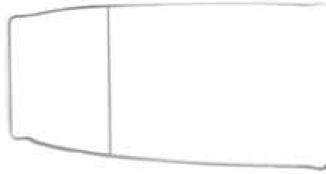

Connect the 3 piece medium poles together using the same number system by connecting them with the arch poles.

---

## STEP 5: CONNECT CENTRE SUPPORTS

---

Lift your frame upright. Connect the last 3 pieces of the large pole kit together and place it in the centre of the frame for added support.

---

## STEP 6: PUT 3-PIECE RODS TOGETHER

---

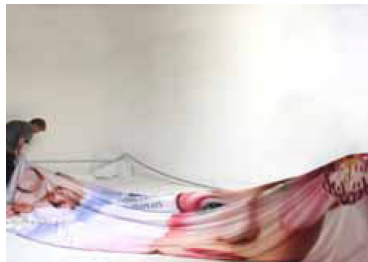

Take the thin 3 piece poles and put them together. Once together place them inside the holes on each side of the frame.

---

## STEP 7: SLIDE YOUR GRAPHIC IN

---

Laying the frame with curve facing up, slide your graphic facing up over the frame until it is a snug fit.

Zip it all together and you're done!
